

"Follow the Science!" (?)

Dr. Salk discovered an effective vaccine against polio.

Dr. Barnard successfully transplanted a human heart.

Penicillin - a good weapon against infections.

We came to trust science, (it seemed to be a friend of humanity), but to many, Science evolved into a god, (which, by the way, is a basic tenet/doctrine of modern Marxist dogma). This philosophy took wing in the 1920's with the theory of evolution, (and later, relativity). These theories proclaimed that there is no God, who created, and that we must replace belief in Him with belief in the new 'God' of Science. Science then veered down a sinister, dark road.

So it was then, when covid came, it became a tailor-made crisis to open the door wide to 'The New World Order'.

A perfect time to control: the economy, the people, the governments, travel and trade, thinking by propaganda, the free flow of goods and services (capitalism), and the money.

We were told that Science created an 'effective vaccination' against Covid (covid is now a minor god), so we must all get vaxed (and boosters too), because who can question the 'God of (which is) Science'?!

They demand "Get vaxed!", (have the new nano-technology injected into your body). And this is a mandate - you must, or lose your job, even if your job is deemed essential.

And now, even children as young as 5yrs old get vaxed.

Yes, we used to trust and 'follow the science', but now, it's being used as a monster-master, instead of a helpful servant.
